

A critical view of the climate change controversy, designed for independent thinkers. Regardless of what your opinion might be, this book will serve as a guide in understanding the core issues and the positions of both sides. Just about every significant aspect of the controversy is considered here, including, but not limited to, the global warming phenomenon itself and the possible role of fossil fuel emissions in causing it; the so-called "hiatus" in warming over recent years; the various explanations offered to account for the hiatus; and the question of whether extreme events such as droughts, hurricanes, flooding, etc. can be attributed to so-called "Anthropogenic Global Warming" (AGW).

Sediment and the Environment: Proceedings of a Symposium Held During the Third IAHS Scientific Assembly at Baltimore, May 1989 (IAHS Proceedings & Reports), Emergency Psychiatry, The Making of Latin: An Introduction to Latin, Greek and English Etymology, The Last Place You Look: A Contrarians Guide to Dating and Finding Love, Principles of Microeconomics, Brief Edition, A Harvest of Love,
